

1. Which component executes Java bytecode?
→ ☐ (C) JAVA
2. Which tool compiles Java source code?
→ ☐ (B) Java
3. Which is a primitive type?
→ ☐ (B) int
4. Which is a reference type?
→ ☐ (D) string
5. What is widening conversion?
→ ☐ (B) int to double
6. Which operator represents logical AND?
→ ☐ (C) &&
7. Which method returns the number of characters in a string?
→ ☐ (C) length()
8. Which method compares String contents?
→ ☐ (B) equals()
9. Which Scanner method reads an integer?
→ ☐ (A) nextInt()
10. Which output method formats output using format specifier?
→ ☐ (C) printf()
11. Which statement is best suited for multiple fixed choice?
→ ☐ (B) switch.
12. Which loop always executes at least once?
→ ☐ (C) do-while.
13. What does break do?
→ ☐ (B) Exits the loop/switch.
14. What does continue do?
→ ☐ (B) Skips current iteration.
15. What does array.length represent?
→ ☐ (B) Number of element.

Group B

16. Java is considered platform independent because of without changing source code of Java program it can run any operating such as a linux, windows.

<u>17. Features</u>	<u>JDK</u>	<u>JRE</u>	<u>JVM</u>
Full Form	Java Development kit	Java Runtime Environment	Java virtual Machine
Main purpose	Used to develop & manage program	Used to Java programs	Used to execute Java bytecode.
Example	JavaC, Sava	Java	converts byte code into machine code

18. Without main() the Java programme generally can't start running.

25. Break purpose - It is used to exit the loop.

Continue purpose - It is used to skip current iteration.
